

HIGHER CERTIFICATE IN WATER TREATMENT

Qualification code: HCWT19 - NQF Level 5 (120 credits)

SAQA ID: 101588, CHE NUMBER: H16/E047CAN

Campus where offered:

Arcadia Campus

REMARKS

a. *Admission requirement(s) and selection criteria:*

• **FOR APPLICANTS WHO OBTAINED A SENIOR CERTIFICATE BEFORE 2008:**

Admission requirement(s):

A Senior Certificate or an equivalent qualification, with at least an E symbol for English, Mathematics and Physical Science.

Selection criteria:

To be considered for this qualification, applicants must have an Admission Point Score (APS) of at least **18**.

• **FOR APPLICANTS WHO OBTAINED A NATIONAL SENIOR CERTIFICATE IN OR AFTER 2008:**

Admission requirement(s):

A National Senior Certificate with a higher certificate endorsement, or an equivalent qualification, with an achievement level of at least 3 for English (home language or first additional language), 3 for Mathematics (or 6 for Mathematical Literacy) and 3 for Physical Sciences.

Selection criteria:

To be considered for this qualification, applicants must have an Admission Point Score (APS) of at least **18** (with Mathematics) or **21** (with Mathematical Literacy).

Assessment procedures:

Applicants with a score of 18 and more will be considered for admission.

• **FOR APPLICANTS WHO OBTAINED A QUALIFICATION FROM TECHNICAL AND VOCATIONAL EDUCATION AND TRAINING (TVET) COLLEGES (PREVIOUSLY KNOWN AS FET COLLEGES):**

Applicants with a National Certificate (Vocational) at NQF Level 4:

Admission requirement(s):

A National Certificate (Vocational) at NQF Level 4 issued by the Council for Quality Assurance in General and Further Education and Training (Umalusi), with at least 50% for English and Mathematics, Physical Sciences, Life Orientation (excluded for APS calculation) and any three vocational subjects.

Selection criteria:

To be considered for this qualification, applicants must have an Admission Point Score (APS) of at least **24**.

Applicants with a National N Certificate as published in Nated 191: N3 (NQF Level 4):

Admission requirement(s):

- A National Senior Certificate or a National N Certificate as published in Nated 191: N3 (NQF Level 4) issued by both the Department of Higher Education (DHET) and the Council for Quality Assurance in General and Further Education and Training (Umalusi), with at least 50% for English, 50% for Mathematics N3, Engineering Science N3, and any two additional N3 subjects; **or**

- A Further Education and Training Certificate: Water and Wastewater Treatment Process Control Supervision at NQF Level 4.

Selection criteria:

To be considered for this qualification, applicants must have an Admission Point Score (APS) of at least **24**.

- b. *Minimum duration:*
One year.
- c. *Presentation:*
Day and block-mode classes (block-mode classes are only offered to students who are employed).
- d. *Intake for the qualification:*
January only.
- e. *Exclusion and readmission:*
See Chapter 2 of Students' Rules and Regulations.
- f. *Recognition of Prior Learning (RPL), equivalence and status:*
See Chapter 30 of Students' Rules and Regulations.
- g. *Module credits:*
Module credits are shown in brackets after each module.

CURRICULUM

YEAR MODULES

CODE	MODULE	NQF-L	CREDIT	PREREQUISITE MODULE(S)
ALI125D	Academic Literacy (block module)	(5)	(2)	
COE105X	Communication for Academic Purpose	(5)	(10)	
CPL105X	Computer Literacy	(5)	(10)	
ESA115C	Equipment and Safety I (second-semester module)	(5)	(18)	
LFS125X	Life Skills (block module)	(5)	(2)	
WQU105C	Water Quality I	(5)	(18)	
WSC105C	Water Science I	(5)	(18)	
WTR105C	Water Treatment I	(5)	(21)	
WWT105C	Wastewater Treatment I	(5)	(21)	
TOTAL CREDITS FOR THE QUALIFICATION:			120	

MODULE INFORMATION (OVERVIEW OF SYLLABUS)

The syllabus content is subject to change to accommodate industry changes. Please note that a more detailed syllabus is available at the Department or in the study guide that is applicable to a particular module. On 01 August 2018, the syllabus content was defined as follows:

A

ACADEMIC LITERACY (ALI125D)

CONTINUOUS ASSESSMENT

(Module custodian: Directorate of Library and Information Services)

Introduction of information literacy. Development of a search strategy and application of a search string to search engines and academic databases. Evaluation of information sources. Ethical and legal use of information. (Total tuition time: not available)

C**COMMUNICATION FOR ACADEMIC PURPOSE (COE105X)****1 X 3-HOUR PAPER****(Module custodian: Department of Applied Languages)**

A workable knowledge of English is an essential skill for any graduate who is required to conduct themselves successfully in a professional working environment. This module will equip students with the competencies required to compose a selection of written texts related to communicating both internally and externally within a professional environment. In addition, the module includes strategies that are essential for the effective communication in various situations, including small groups to avoid unproductive conflict, a multicultural context, etc. (Total tuition time: not available)

COMPUTER LITERACY (CPL105X)**CONTINUOUS ASSESSMENT****(Module custodian: End User Computing Unit)**

Introduction of information literacy. Development of a search strategy and application of a search string to search engines and academic databases. Evaluation of information sources. Ethical and legal use of information. (Total tuition time: not available)

E**EQUIPMENT AND SAFETY I (ESA115C)****1 X 3-HOUR PAPER****(Module custodian: Department of Environmental, Water and Earth Sciences)**

Prepares the student to apply knowledge and skills about water treatment equipment in the distribution system, wastewater treatment and wastewater collection systems, and for the production of safe drinking water. The student will be able to apply his/her knowledge of equipment used in the various unit processes to produce effluents of the required quality sustainably and to operate a treatment plant safely. Upon completion of the module, the student will be able to operate and maintain pumps, pipes, valves, instruments and processes equipment safely. (Total tuition time: not available)

L**LIFE SKILLS (LFS125X)****CONTINUOUS ASSESSMENT****(Module custodian: Directorate of Student Development and Support)**

Academic, personal and socio-emotional skills development for students in higher education. Personal and social dimensions address: effective planning and self-management (goal setting and time management); Adjusting to university life (student life, diversity and change); Intra- and interpersonal skills development (conflict management, self-esteem, relationship management); Effective living (healthy living, HIV education, substance abuse); Academic dimension addresses: academic skills for university (e.g. critical thinking, creativity, managing assignments and assessments). (Total tuition time: not available)

W**WASTEWATER TREATMENT I (WWT105C)****1 X 3-HOUR PAPER****(Module custodian: Department of Environmental, Water and Earth Sciences)**

Prepares the student to demonstrate an understanding of wastewater treatment practice in ways that produce good quality wastewater effluents. The student will be able to apply his/her knowledge of the various unit processes to produce wastewater effluents that comply with the effluents standards as set by the custodian (Department of Water Affairs and Forestry). Upon completion of this module, the student will be equipped to understand, explain and discuss the roles of a process controller such as to safely operate and maintain wastewater treatment facilities. This will include correct handling of machinery and chemicals; safe and effective performance of the control tests, and their interpretation and application in the plant operation; as well as the regular reporting and recording of day to day activities. (Total tuition time: not available)

WATER QUALITY I (WQU105C)**1 X 3-HOUR PAPER****(Module custodian: Department of Environmental, Water and Earth Sciences)**

Prepares the student to apply knowledge and skills about maintaining water quality from water sources and evaluating the quality of water produced by water and wastewater treatment plants. The student will be able to apply his/her knowledge of various laboratory techniques to evaluate the performance of water treatment plants in order to produce effluents which are acceptable according to water quality guidelines. Upon completion of the module the student will be able to apply his/her knowledge and skills to evaluate the quality of water from different water sources and treatment plant unit processes. The student will also have knowledge and skills to perform basic water analysis. (Total tuition time: not available)

WATER SCIENCE I (WSC105C)**1 X 3-HOUR PAPER*****(Module custodian: Department of Environmental, Water and Earth Sciences)***

Prepares the student to apply basic science knowledge and skills in the production of drinking water and the treatment of wastewater. The student will be equipped with knowledge of chemical reactions which take place in water, and microbial processes in water treatment, as well as basic mathematics and physics concepts and competencies relevant to water treatment operations. Upon completion, the student will be able to apply his/her knowledge of chemistry, microbiology, mathematics and physics to operate and control water and wastewater treatment plants. (Total tuition time: not available)

WATER TREATMENT I (WTR105C)**1 X 3-HOUR PAPER*****(Module custodian: Department of Environmental, Water and Earth Sciences)***

Prepares the student to apply knowledge and skills about water treatment unit processes and equipment to produce drinking water from a variety of raw water sources. The student will be able to apply his/her knowledge of the various unit processes to produce effluents that comply with the relevant legislation and water quality guidelines in a sustainable manner. Upon completion of the module the student will be able to apply his/her knowledge and skills to treat potable water in a conventional treatment process by making use of the following unit processes: coagulation, flocculation, sedimentation, filtration and disinfection. The student will also have knowledge and skills about a range of unit processes that can be used to treat water to address specific water quality problems such as stability, hardness, fluoride and salinity. (Total tuition time: not available)
