

POSTGRADUATE DIPLOMA IN INFORMATION TECHNOLOGY

Qualification code: PDIT21 - NQF Level 8 (120 credits)

SAQA ID: 110062, CHE NUMBER: H/H16/E171CAN

Campus where offered:

Soshanguve South Campus

REMARKS

a. *Admission requirement(s):*

An Advanced Diploma in Information Technology in the field of Computer Networks or Cyber Security, **or** a Baccalaureus Technologiae: Information Technology in the field of Communication Networks or Support Services, **or** a relevant bachelor's degree, **or** an equivalent qualification at NQF level 7 with specialisation in Computer Networks or Cyber Security. Preference will be given to candidates who obtained an average of 60% in the previous qualification.

Holders of any other equivalent South African or international qualification may also be considered, see Chapter 1 of Students' Rules and Regulations.

b. *Selection criteria:*

Admission is subject to selection. Candidates are evaluated based on the previous qualification obtained and/or work experience.

Acceptance is subject to available capacity according to the Student Enrolment Plan (SEP). Applicants will be informed of their status per official letter from the Office of the Registrar, alternatively, they can check their application status on the TUT website, www.tut.ac.za.

c. *Recognition of Prior Learning (RPL), equivalence and status:*

See Chapter 30 of Students' Rules and Regulations.

d. *Intake for the qualification:*

January only.

e. *Presentation:*

Day classes offered on Saturdays over a period of two years.

f. *Duration:*

A minimum of one or two years (depending on the programme offering).

g. *Re-registration:*

A student may re-register for the module Network Research Project V only with the permission of the Head of the Department. The purpose of the re-registration is to provide students with an opportunity to complete the project only, and not to redo it, should they fail the module.

h. *Exclusion and readmission:*

See Chapter 2 of Students' Rules and Regulations.

CURRICULUM

Modules are offered as determined by the Head of the Department.

ATTENDANCE 2021

CODE	MODULE	NQF-L	CREDIT	PREREQUISITE MODULE(S)
FIRST SEMESTER				
PIT118G	Principles of Research V	(8)	(15)	
SCN118G	Social Engineering and New Trends in Networks	(8)	(15)	

SECOND SEMESTER

DFO118G Digital Forensics V (8) (15)

plus one of the following modules:

CN1118G Computer Networks 501 (8) (15)

CSY118G Computer Security 501 (8) (15)

AND

One of the following modules:

SPG118G Security Policy and Governance 501 (8) (15)

NWA118G Network Management 501 (8) (15)

TOTAL CREDITS FOR THE YEAR: 75

ATTENDANCE 2022

CODE	MODULE	NQF-L	CREDIT	PREREQUISITE MODULE(S)
NWR108G	Network Research Project V	(8)	(15)	Principles of Research V
NWR118R	Network Research Project V (re-registration) (first-semester module)	(8)	(0)	

FIRST SEMESTER

One of the following modules:

CN2118G Computer Networks 502 (8) (15) Computer Networks 501

CRG118G Cryptography 502 (8) (15) Computer Security 501

SECOND SEMESTER

One of the following modules:

EHA118G Ethical Hacking 502 (8) (15) Computer Security 501

SDN118G Software Defined Networks 502 (8) (15) Computer Networks 501

TOTAL CREDITS FOR THE YEAR: 45

TOTAL CREDITS FOR THE QUALIFICATION: 120

MODULE INFORMATION (OVERVIEW OF SYLLABUS)

The syllabus content is subject to change to accommodate industry changes. Please note that a more detailed syllabus is available at the Department or in the study guide that is applicable to a particular module. At time of publication, the syllabus content was defined as follows:

C

COMPUTER NETWORKS 501 (CN1118G)

1 X 3-HOUR PAPER

(Module custodian: Department of Information Technology)

The general purpose of this module is to provide students with the Internet and Computer networks in general, different WAN technologies used to accomplish different communication tasks, network security and applications. The emphasis is on equipping the students to be competent problem solvers that can originate and recommend computer network strategies. (Total tuition time: not available)

COMPUTER NETWORKS 502 (CN2118G)**1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The general purpose of this module is to provide students with the necessary tools and techniques to design and implement networks. The emphasis is on equipping the students to be competent problem solvers that can originate and recommend computer network strategies. (Total tuition time: not available)

COMPUTER SECURITY 501 (CSY118G)**1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The emphasis of this module is on equipping the students to be competent problem solvers that can originate and recommend security strategies. (Total tuition time: not available)

CRYPTOGRAPHY 502 (CRG118G)**1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The emphasis of this module is on equipping the students to be competent problem solvers that can originate and recommend Cryptography Terminologies. (Total tuition time: not available)

D**DIGITAL FORENSICS V (DFO118G)****1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The general purpose of this module is to provide students with the internet and computer digital forensics, principles and methodologies of digital forensics, software and hardware digital forensics tools. The emphasis is on equipping the students to be competent problem solvers that can originate and recommend digital forensics strategies. (Total tuition time: not available)

E**ETHICAL HACKING 502 (EHA118G)****1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The student will learn the basics of ethical and moral technology hacking. The module teaches the student how to find weak points and compositional errors in computer networks and systems. (Total tuition time: not available)

N**NETWORK MANAGEMENT 501 (NWA118G)****1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The general purpose of this module is to provide students with an overview of network management, this includes an understanding of the building blocks of network management with its associate remote networking tools that can be applied to network infrastructures. (Total tuition time: not available)

NETWORK RESEARCH PROJECT V (NWR108G, NWR118R)**PROJECT ASSESSMENT*****(Module custodian: Department of Information Technology)***

This module summarises learnings of student registered for the postgraduate diploma into a research project. The student will learn how, and when, to use quantitative and qualitative techniques to investigate different research questions. The student will practice and apply these techniques by producing research questions, conducting literature reviews, data collection, analysis and interpretation, including the use of specialist computer packages. (Total tuition time: not available)

P**PRINCIPLES OF RESEARCH V (PIT118G)****CONTINUOUS ASSESSMENT*****(Module custodian: Department of Information Technology)***

The general purpose of this module is to prepare the student to investigate and analyse a research problem using introductory research methods and tools that are commonly used in computing and related research fields. The module will also enable participants to formulate, define research problems and questions, critically review the literature, research designs and reported research findings, evaluate and select appropriate research methods and data collection techniques for formulating ethical research proposals. (Total tuition time: not available)

S**SECURITY POLICY AND GOVERNANCE 501 (SPG118G)****1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The emphasis is on equipping the students to implement computer security governance process and procedure and recommend security strategies. (Total tuition time: not available)

SOCIAL ENGINEERING AND NEW TRENDS IN NETWORKS (SCN118G)**1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The general purpose of this module is to provide students with an overview of social engineering techniques and countermeasures as well as ethical, privacy and security issues in the online social network ecosystem. (Total tuition time: not available)

SOFTWARE DEFINED NETWORKS 502 (SDN118G)**1 X 3-HOUR PAPER*****(Module custodian: Department of Information Technology)***

The content of this module includes examining the structure and capabilities of commercial and open source controllers whereby a detailed information on constructing and maintaining a software defined network infrastructure is explained. (Total tuition time: not available)
