

POSTGRADUATE DIPLOMA IN INFORMATICS

Qualification code: PDIF21 - NQF Level 8 (120 credits)

SAQA ID: 111841, CHE NUMBER: H/H16/E174CAN

Campus where offered:

Soshanguve South Campus

REMARKS

a. Admission requirement(s):

An Advanced Diploma in Informatics, **or** a Baccalaureus Technologiae: Information Technology in the field of Business Applications or Knowledge Management or Information Management or Business Information Systems, **or** a Bachelor's degree in Informatics or in Information Systems, **or** an equivalent specialisation qualification at NQF level 7 with 120 credits. Preference will be given to candidates who obtained an average of 60% in the previous qualification.

Holders of any other equivalent South African or international qualification may also be considered, see Chapter 1 of Students' Rules and Regulations.

b. Selection criteria:

Admission is subject to selection. Candidates are evaluated based on the previous qualification obtained and/or work experience.

Acceptance is subject to available capacity according to the Student Enrolment Plan (SEP). Applicants will be informed of their status per official letter from the Office of the Registrar, alternatively, they can check their application status on the TUT website, www.tut.ac.za.

c. Recognition of Prior Learning (RPL), equivalence and status:

See Chapter 30 of Students' Rules and Regulations.

d. Intake for the qualification:

January only.

e. Presentation:

Day classes offered on Saturdays over a period of two years.

f. Duration:

A minimum of one or two years (depending on the programme offering).

g. Re-registration:

A student may re-register for the module Advanced Research Project only with the permission of the Head of the Department. The purpose of the re-registration is to provide students with an opportunity to complete the project only, and not to redo it, should they fail the module.

h. Exclusion and readmission:

See Chapter 2 of Students' Rules and Regulations.

CURRICULUM

Modules are offered as determined by the Head of the Department.

MODULE INFORMATION (OVERVIEW OF SYLLABUS)

The syllabus content is subject to change to accommodate industry changes. Please note that a more detailed syllabus is available at the Department or in the study guide that is applicable to a particular module. At time of publication, the syllabus content was defined as follows:

A

ADVANCED BUSINESS ANALYSIS AND APPLICATION (BAA118G) 1 X 3-HOUR PAPER *(Module custodian: Department of Informatics)*

The student will be able to apply his/her knowledge of SDLC and advanced systems analysis techniques to initiate, plan, design, and deploy information systems solutions within an organisation and be able to adapt to best practices in relation to information systems projects. (Total tuition time: not available)

ADVANCED IT PROJECT MANAGEMENT (IPT118G) 1 X 3-HOUR PAPER *(Module custodian: Department of Informatics)*

This module prepares the student to apply advanced project management principles in an Information Systems environment. It is aligned with the PMBOK and the standard for Portfolio Management guide. (Total tuition time: not available)

ADVANCED KNOWLEDGE MANAGEMENT (KWM118G) 1 X 3-HOUR PAPER *(Module custodian: Department of Informatics)*

The student will be able to apply his/her knowledge of KM in the different management disciplines throughout the various functional enterprise environments, apply the different organisational theories and the management of intellectual capital. Upon completion of the module, the student will be able to apply, explain, design, and deploy advanced KM solutions within an organisation. (Total tuition time: not available)

ADVANCED RESEARCH PROJECT (ARP108G, ARP118R) PROJECT ASSESSMENT *(Module custodian: Department of Informatics)*

Upon completion of the module, the student will know a research paradigms, the difference between positivist, non-positivist (interpretivist) and Design Science research approaches, describe and explain reasons for the choice of these approaches in any research project, but also for a particular proposed research project, and be able to design a research plan including research methods, data collection instruments and data analysis aligned with the chosen research approach. (Total tuition time: not available)

RESEARCH METHODOLOGY (RIF118G)**CONTINUOUS ASSESSMENT**

(Module custodian: Department of Informatics)

The student will understand, select and apply research methodologies, paradigms and techniques to Information Technology research projects. The student will be able to apply his/her knowledge of the most common Information Systems (IS) research strategies and techniques. (Total tuition time: not available)
