

NATIONAL DIPLOMA: INFORMATION TECHNOLOGY: COMMUNICATION NETWORKS (Extended curriculum programme with foundation provision) Qualification code: NDIKF1 - NQF Level 6

Campus where offered: Soshanguve South Campus (day classes offered during the week and on Saturdays)
Last year of new intake: 2019
Teach-out (phase-out) date: 31 December 2024

Students registered for this qualification should complete their studies according to the teach-out date prescribed for the qualification, subject to the stipulations of Regulation 3.1.11 and 3.1.13 in the Students' Rules and Regulations.

Information on phased-out programmes can be obtained from the TUT website, www.tut.ac.za.

Key to asterisks:

* Information does not correspond to information in Report 151.
(Deviations approved by the Senex on 22 June 2011.)

CURRICULUM

Consult the 2019 Faculty Prospectus for the full contents of the qualification.

Please note that students will register for all first- and second-year subjects under qualification code NDITF1.

FIRST YEAR

CODE	SUBJECT	CREDIT	PREREQUISITE SUBJECT(S)
FIRST SEMESTER			
FPALS01	Foundation Academic and Language Skills	(0,125)	
FPITM01	Foundation ICT Mathematical Skills	(0,125)	
TOTAL CREDITS FOR THE SEMESTER:		0,250	
SECOND SEMESTER			
FPIDS01	Foundation Information and Software Development Skills	(0,125)	
FPPRS01	Foundation Presentation and Reporting Skills	(0,125)	
TOTAL CREDITS FOR THE SEMESTER:		0,250	
TOTAL CREDITS FOR THE FIRST YEAR:		0,500	

SECOND YEAR

After completion of all first-year subjects.

CODE	SUBJECT	CREDIT	PREREQUISITE SUBJECT(S)
FIRST SEMESTER			
CFS10AT	Computing Fundamentals IA	(0,062)	
CGS10AT	Computing Systems IA	(0,062)	
CMK10AT	Computing Skills IA	(0,063)	
DSO17AT	Development Software IA	(0,063)	
TOTAL CREDITS FOR THE SEMESTER:		0,250	

SECOND SEMESTER

CFS10BT	Computing Fundamentals IB	(0,062)	
CGS10BT	Computing Systems IB	(0,062)	
CMK10BT	Computing Skills IB	(0,063)	
DSO17BT	Development Software IB	(0,063)	Development Software IA

TOTAL CREDITS FOR THE SEMESTER: 0,250

TOTAL CREDITS FOR THE SECOND YEAR: **0,500**

As from the third year, a student will register for the specialisation field: Communication Networks (NDIKF1).

THIRD YEAR

CODE	SUBJECT	CREDIT	PREREQUISITE SUBJECT(S)
------	---------	--------	-------------------------

FIRST SEMESTER

COB20AT	Communication Networks IIA	(0,125)	Computing Systems IB
DSA20AT	Distributed Systems IIA	(0,125)	
IIE20AT	IT Electronics IIA	(0,125)	
ITT10AT	IT Mathematics IA	(0,125)	
TPG12AT	Technical Programming IA	(0,125)	Development Software IB

TOTAL CREDITS FOR THE SEMESTER: 0,625

SECOND SEMESTER

COB20BT	Communication Networks IIB	(0,125)	Communication Networks IIA IT Mathematics IA
DSA20BT	Distributed Systems IIB	(0,125)	Distributed Systems IIA Technical Programming IA
IIE20BT	IT Electronics IIB	(0,125)	IT Electronics IIA
ITT10BT	IT Mathematics IB	(0,125)	IT Mathematics IA
TPG12BT	Technical Programming IB	(0,125)	Technical Programming IA

TOTAL CREDITS FOR THE SEMESTER: 0,625

TOTAL CREDITS FOR THE THIRD YEAR: **1,250**

FOURTH YEAR

CODE	SUBJECT	CREDIT	PREREQUISITE SUBJECT(S)
------	---------	--------	-------------------------

FIRST SEMESTER

COB30AT	Communication Networks IIIA	(0,125)	Communication Networks IIB
COB30BT	Communication Networks IIIB	(0,125)	Communication Networks IIB
DSA30AT	Distributed Systems IIIA*	(0,125)	Communication Networks IIB Distributed Systems IIA Distributed Systems IIB
DSA30BT	Distributed Systems IIIB*	(0,125)	Communication Networks IIB Distributed Systems IIA Distributed Systems IIB
IDC30AT	Industry Exposure IIIA	(0,125)	

TOTAL CREDITS FOR THE SEMESTER: 0,625

SECOND SEMESTER

On completion of all the above subjects. Students with only one subject outstanding may be allowed to register for that subject and Industry Exposure IIIB with the approval of the Head of Department.

IDC30BC	Industry Exposure IIIB	(0,125)
TOTAL CREDITS FOR THE SEMESTER:		0,125
TOTAL CREDITS FOR THE FOURTH YEAR:		0,750
TOTAL CREDITS FOR THE QUALIFICATION:		3,000

SUBJECT INFORMATION (OVERVIEW OF SYLLABUS)

The syllabus content is subject to change to accommodate industry changes. Please note that a more detailed syllabus is available at the Department or in the study guide that is applicable to a particular subject. At time of publication, the syllabus content was defined as follows:

C

COMMUNICATION NETWORKS IIA (COB20AT) 1 X 3-HOUR PAPER

(Subject custodian: Department of Information Technology)

This subject covers various aspects and technologies involved in data communication and networking. Students are introduced to topics such as network topologies, transmission fundamentals, contention protocols, data compression techniques, data security and integrity, flow-control protocols and the various IEEE standards. The emphasis is on giving students a sound understanding of local area networks (LANs), although aspects of wide area networks (WANs) are also covered briefly. (Total tuition time: ± 80 hours)

COMMUNICATION NETWORKS IIB (COB20BT) 1 X 3-HOUR PAPER

(Subject custodian: Department of Information Technology)

This subject equips the student to install, configure, operate, and troubleshoot medium-size routed and switched networks. Topics covered include Switched and Routed Networks, Static and Dynamic Routing, IOS, IPv4, IPv6, RIP (Routing Information Protocol), single area OSPF (Open Shortest Path First), VLANs, VLSM, DHCP (Dynamic Host Configuration Protocol), and ACLs (Access Control Lists). (Total tuition time: ± 80 hours)

COMMUNICATION NETWORKS IIIA (COB30AT) 1 X 3-HOUR PAPER

(Subject custodian: Department of Information Technology)

To provide a practical survey of network security applications and standards. The subject covers concise survey of the cryptographic algorithms and protocols underlying network security applications, network security tools and applications, and system-level security issues. (Total tuition time: ± 80 hours)

COMMUNICATION NETWORKS IIIB (COB30BT) 1 X 3-HOUR PAPER

(Subject custodian: Department of Information Technology)

This subject covers various aspects and technologies involved in wireless and mobile networks. Students are introduced to topics such as ad-hoc network, wireless routing protocols, vehicular area network, wireless sensor networks, IEEE 802.11 (WLAN), Bluetooth, GSM network, handoff and roaming, channel allocation, and satellite systems. The subject is aimed at giving students a solid understanding of wireless networks, mobile systems and satellite systems. (Total tuition time: ± 80 hours)

COMPUTING FUNDAMENTALS IA (CFS10AT) 1 X 3-HOUR PAPER

(Subject custodian: End User Computing Unit)

The student is introduced to the fundamentals of computers and information systems, computer organisation and data processing. (Total tuition time: ± 90 hours)

COMPUTING FUNDAMENTALS IB (CFS10BT) 1 X 3-HOUR PAPER

(Subject custodian: End User Computing Unit)

The basic concepts of system development, data management, management information systems, ethics, privacy and security, purchasing and maintaining microcomputers, number systems and binary logic. (Total tuition time: ± 54 hours)

COMPUTING SKILLS IA (CMK10AT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Informatics)**

This subject aims to equip the student with fundamentals of IT Soft skills for both the ICT industry and other working environments upon which a successful career can be built. In addition, it will also improve the student's relation and interaction abilities needed within the dynamic ICT industry. The student who successfully completes this subject must identify and implement various thinking skills and learning styles, state the legal and cultural sensitivity issues of IT, identify and explain the variety of soft skills including study skills and strategies, research, presentation as well as communication skills, and identify and explain interpersonal skills in relation to character, time management and team building dynamics and conflict resolution. (Total tuition time: ± 60 hours)

COMPUTING SKILLS IB (CMK10BT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Informatics)**

The aim of this subject is to extend the skills in CMK10 AT so as to improve on student's relations and interaction capabilities that will be applicable within the dynamic ICT industry and the external environment. The student who successfully completes this subject must describe, distinguish and portray changes in terms of personality profiles, emotional intelligence, self-management, stress management and relationship management; identify and apply the notion of team dynamics; deal with conflict and understand the dynamics behind change; report on effective correspondence; produce meeting documents; conduct meetings; and demonstrate the required communication skills to develop interpersonal business relationships through by means of group work. (Total tuition time: ± 60 hours)

COMPUTING SYSTEMS IA (CGS10AT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Computer Systems Engineering)**

Introduction to hardware, operating systems, motherboards, processors, memory, hard drives, installing and supporting I/O devices, multimedia devices and mass storage, PC maintenance and troubleshooting strategies, and installing and maintenance of Windows. (Total tuition time: ± 54 hours)

COMPUTING SYSTEMS IB (CGS10BT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Information Technology)**

Provides the foundation of data communications and local area management, OSI model and/or TCP/IP protocol stack model, data transmission principles, media, major protocols, topologies, routing methods, introduction to networking principles and network operating system fundamentals. (Total tuition time: ± 54 hours)

D**DEVELOPMENT SOFTWARE IA (DSO17AT)****1 X 4-HOUR COMPUTER-BASED****(Subject custodian: Department of Computer Science)**

Aim: To learn to solve problems using the basic programming principles, and then practically apply that knowledge in C++. Objectives: To enable the student to understand problems and know how to solve them by using a computer; understand the general concepts and arithmetic used in programming, sequence, selection and iteration control structures and a variety of built-in data types, including strings. The students are exposed to the concept of event-driven programming in a visual programming environment focusing on the development of graphical user interfaces to solve real-life practical programming problems. (Total tuition time: ± 72 hours)

DEVELOPMENT SOFTWARE IB (DSO17BT)**1 X 4-HOUR COMPUTER-BASED****(Subject custodian: Department of Computer Science)**

Aim: To expand on the already mastered knowledge obtained in Development Software IA. Objectives: To broaden the programming skills base of the student by adding the following topics: write an algorithm and applying it in VB.NET/C++ using functions and sub-procedures, and write an algorithm containing one-dimensional arrays. String manipulation will be continued as well as a brief introduction to text file processing. (Total tuition time: ± 72 hours)

DISTRIBUTED SYSTEMS IIA (DSA20AT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Information Technology)**

Aim: To introduce the student to principles and paradigms of distributed systems. Outcomes: To be able to understand and discuss distributed systems fundamental; the architectural design of distributed systems; the functionalities of processes playing a key role in distributed systems; the inter-processes communication modes in distributed systems; the ways by which resources or entities can be identified and located; how distributed system concepts are applied in some real world systems. Topics: Characterisation of a distributed system, distributed systems architecture, processes, inter-process communication, naming services and distributed file systems. (Total tuition time: ± 80 hours)

DISTRIBUTED SYSTEMS IIB (DSA20BT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Information Technology)**

This subject builds on DSA20AT. It covers synchronisation algorithms for time and events, mutual exclusion, election of coordinator, fault tolerance, replication and consistency. Examples of distributed system are also discussed. (Total tuition time: ± 80 hours)

DISTRIBUTED SYSTEMS IIIA (DSA30AT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Information Technology)**

Aim: To give a comprehensive introduction to the theory and applications of distributed algorithms, as these algorithms arise in a range of network communication systems. Outcomes: To be able to understand the aspects that make determination of global configurations or behaviour of distributed systems not to be easy; model message-passing communicating systems using formal methods; apply communication protocols and routing algorithms in interconnected collection of processes; apply traversal and election algorithms in general synchronous networks. Topics: Transition systems and algorithms; Balanced Sliding Window Protocol; Routing Algorithms, Wave and Traversal algorithms; Election algorithms. (Total tuition time: ± 80 hours)

DISTRIBUTED SYSTEMS IIIB (DSA30BT)**1 X 3-HOUR PAPER****(Subject custodian: Department of Information Technology)**

This subject covers a comprehensive introduction to the Cloud computing technology. The three-layered Cloud service model, with emphasis on the infrastructure as a service(IaaS) and platform as a service(PaaS), Cloud deployment models and Cloud security are some of the topics in this subject.(Total tuition time: ± 80 hours)

F**FOUNDATION ACADEMIC AND LANGUAGE SKILLS (FPALS01)****1 X 3-HOUR PAPER****(Subject custodian: ICT First Years' and Foundation Unit)**

Aim/Purpose: To provide a sound foundation for, and to enhance basic language proficiency and academic skills necessary for reading, writing and studying in an ICT environment. Objectives: Analyse, adjust and improve study skills. Apply research skills in assignments. Interpret and reflect on all available and relevant resource material in proper English. Communicate in a comprehensible and clear manner in both a general and subject-specific manner showing cultural sensitivity. Demonstrate intermediate-level proficiency in oral and written English. Key topics: Managing adjustment problems: student life, coping with diversity and change, time management, setting goals and note taking, summarising techniques, English vocabulary and grammar, reading and writing skills. (Total tuition time: ± 84 hours)

FOUNDATIONAL ICT MATHEMATICAL SKILLS (FPITM01)**1 X 3-HOUR PAPER****(Subject custodian: ICT First Years' and Foundation Unit)**

Aim/Purpose: The focus of the subject is to ensure students have the necessary mathematical and numeracy skills needed for ICT. Students will also be introduced to abstract logical reasoning and computational thinking skills. These skills are further developed through practical exercises relating to various day-to-day problem-solving activities. Objectives: To develop the problem solving skills as well as the computational thinking skills of the student and therefore prepare the student for the programming subjects to follow. Key topics: The number system and basic arithmetic; introduction to algebra: expressions and equations; fractions and decimals, algebraic fractions; percentages; ratio and rate; perimeter, area and volume; measuring systems and units; time, distance and speed; Cartesian plane and coordinates; algebraic functions; matrices. (Total tuition time: ± 96 hours)

FOUNDATION INFORMATION AND SOFTWARE DEVELOPMENT SKILLS (FPIDS01)**1 X 3-HOUR PAPER****(Subject custodian: ICT First Years' and Foundation Unit)**

Aim/Purpose: To prepare students for computer programming by developing logical, critical and lateral thinking skills. Objectives: To develop the students' logical thinking and problem-solving skills as preparation for programming. Abstract logical reasoning and computational thinking skills will therefore be used to solve problems. Key topics: Brain teasers as introduction to problem-solving; analysis and solving of word problems; solving of various day-to-day problems; introduction to algorithmic problem solving - sequence, basic selection, basic repetition steps; statistics; financial matters. (Total tuition time: ± 96 hours)

FOUNDATION PRESENTATION AND REPORTING SKILLS (FPPRS01)**1 X 3-HOUR PAPER*****(Subject custodian: ICT First Years' and Foundation Unit)***

Aim/Purpose: To provide a sound foundation for, and to enhance basic language proficiency skills necessary for reading and writing in an ICT environment with specific reference to presentations and reports. Objectives: Preparation of effective and professional reports and PowerPoint presentations. Interpret, relate and reflect on all available and relevant resource material in proper English. Communicate orally in a comprehensible and clear manner specifically when presenting various IT topics, demonstrate intermediate-level proficiency in written English. Key topics: Conflict management; problem solving; interpersonal relationships; stress management; communication theory; listening skills; public speaking and presentation skills; and report writing. (Total tuition time: ± 84 hours)

I**INDUSTRY EXPOSURE IIIA (IDC30AT)****1 X 3-HOUR PAPER*****(Subject custodian: Department of Informatics)***

This subject enables students to gain insight to organisational characteristics and behaviour, personal and technological entrepreneurship; other issues include ethical and professional conduct in the workplace. The subject will also increase their knowledge of individual behavioural aspects, namely biographical characteristics, values attitudes, job satisfaction and personality and emotions, perceptions and individual decision making; broaden their understanding of the administrative structures of organisations, bureaucratic behaviour in global and diverse context; and develop interpersonal skills in applying and integrating contemporary theories of motivation. (Tuition time: ± 60 hours)

INDUSTRY EXPOSURE IIIB (IDC30BC)**CONTINUOUS ASSESSMENT*****(Subject custodian: Department of Information Technology)***

Industry Exposure IIIB is career-orientated and is aimed at integrating academic training with practical skills, as demanded by industry. Students work in industry for six months. (No formal tuition)

IT ELECTRONICS IIA (IIE20AT)**1 X 3-HOUR PAPER*****(Subject custodian: Department of Computer Systems Engineering)***

Basic components of digital circuits, such as NOT, AND and OR gates. The more complex gate and logic functions are built by using these basic components. Boolean algebra and Karnaugh maps are used to simplify functions. Combination logic circuits, including adders, multi-vibrators, comparators, decoders, encoders, multiplexers and de-multiplexers, are discussed. Binary, octal, decimal and hexadecimal number systems are included. Theoretical presentations are supported by practical experiments in a laboratory. (Total tuition time: ± 80 hours)

IT ELECTRONICS IIB (IIE20BT)**1 X 3-HOUR PAPER*****(Subject custodian: Department of Computer Systems Engineering)***

Basic components of sequential circuits, namely latches and flip-flops. More complex memory components, such as adders and registers, are derived from the basic components. Different analogue-to-digital and digital-to-analogue converters are discussed. In the introduction to microprocessor systems, the central processor, memory, ports and interrupts are dealt with. (Total tuition time: ± 80 hours)

IT MATHEMATICS IA (ITT10AT)**1 X 3-HOUR PAPER*****(Subject custodian: Department of Mathematics and Statistics)***

Basic mathematics. Differentiation. Integration. Matrices and determinants. Vectors. Data handling. Complex numbers or mensuration. (Total tuition time: ± 90 hours)

IT MATHEMATICS IB (ITT10BT)**1 X 3-HOUR PAPER*****(Subject custodian: Department of Mathematics and Statistics)***

Revision of differentiation (Mathematics I). Differentiation of functions with more than one variable. Further integration. Numerical methods. First-order ordinary differential equations. Matrices (Gauss elimination). (Total tuition time: ± 90 hours)

TECHNICAL PROGRAMMING IA (TPG12AT)**1 X 4-HOUR COMPUTER-BASED****(Subject custodian: Department of Computer Science)**

Aim/Purpose: To introduce the student to object-orientated concepts using the Java programming language. Objectives: The student must be able to set up the Java development environment, use the applications coming along with the Java language to compile, bundle together, run and document programs create programs that are in accordance with the Java Naming Convention use pre-defined classes in programs create own classes, use decision statements in a program, use iterative statements in a program manipulate strings and characters in a program, use arrays in a program. Key topics: Java classes, methods, objects, decision making, loops, strings, primitive arrays, reference arrays. (Total tuition time: ± 78 hours)

TECHNICAL PROGRAMMING IB (TPG12BT)**1 X 4-HOUR COMPUTER-BASED****(Subject custodian: Department of Computer Science)**

Aim/Purpose: To introduce the student to advanced OOP principles, robust programming, files manipulation and advanced graphical user interfaces using the java programming language. Objectives: To introduce the students to advanced concepts of OOP such as inheritance, polymorphism. Exception handling mechanisms, introduction to basic graphic and advanced graphic user interface design. Key topics: File manipulations, inheritance, polymorphism, exception handling, GUI components. (Total tuition time: ± 80 hours)
