

## Make use of the revised TUT 101 Course Template

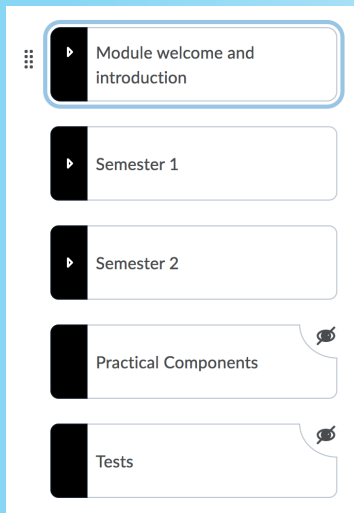

#14

The *TUT 101 Course Template* has evolved since November 2020 when it was applied to all the modules that were migrated from Blackboard to Brightspace.

**Q:** How do I ensure that I use the revised version of the TUT 101 Course Template?

**A:** Make sure that your module displays the current template below.  
Take the following steps to align your course template:

- Rename *Term 1* to *Semester 1* (and *Term 2* to *Semester 2*)
- Rename *Term 3* to *Practical Component* (If not needed hide it)
- Rename *Term 4* to *Tests* (If not needed hide it)
- Bear in mind the Quizzes and Assignment should be placed in-line with the content so that the student can use the < and > buttons
- Rearrange the topics in the Module welcome and introduction unit by dragging and dropping
- Include an *Equipment Needed* topic (If not needed hide it)
- Change the *Weekly Planner* to a *Semester Planner* in the Semester unit
- Place your content under the Semester unit. Feel free to structure your content in Lessons, e.g., Chapters, Units or Weeks to reflect your teaching style
- Make sure that your module looks like the current

Please refer to the *myTUTOR Resources Module TUT101R* for the current version of the TUT Course Template.
