

What does my Student see?

#21

As a lecturer you can ‘toggle’ between the lecturer’s view and how your student will view your course material. It is important to design the module content with your student in mind to make their learning journey through the content as simple and easy as possible.

Q: How can I see what my student will see?

A: Click on your name and select “View as Student”.
To stop viewing as a student, click on your name again and select the X. *myTUTOR* will revert to your view as a lecturer.
