

The cost and access to data is a barrier to teaching and learning in South Africa. Therefore, the effective use of data has become a critical component to effective teaching and learning in our new online reality because of the Covid-19 pandemic.

**Q:** How do I *save data* when using YouTube videos within myTUTOR?

**A:** Follow these tips below:

- For free data ensure that, when the video plays, the URL in the browser starts with: myTUTord2l.tut.ac.za/..... e.g.
- If the URL in the browser starts with: YouTube.com/watch?..., (e.g. the underneath URL) know that data is NOT free.

*NOTE: The terms and conditions for data are determined by cell phone service suppliers. Every supplier manages media rich data differently that might impact on zero-rated and allocated data.*
