

D2L Brightspace Learning Management System

Use of Release Conditions to personalise Announcements

#6

The Announcement Tool available in myTUTOR (Brightspace) is powerful when you use it correctly. Announcements can be sent to your module homepage, a selected group of students or individual students using the Release Conditions functionality. You can also set the release date for the announcement in the same way.

Q: How do I personalise an *Announcement* using the Release Conditions?

A: Create your announcement and then click on Release Conditions to personalise the announcement to a relevant target.
